U88G Series 4K ULED™ Android TV
with Quantum Dot Technology

Premium picture quality. Amazing colour replication. Future-proof your entertainment.

The Hisense U88G Series TV proves to be in the elite class of 4K QLED Pro TVs — inside and out. The Hisense proprietary ULED™ technology, focuses on the most important areas of picture quality, while QLED technology and Wide Color Gamut brings the entertainment to life with more vivid and saturated colours with more subtlety in shades, hues and tones. Premium ULED TVs deliver exquisite, detailed, and lifelike images using Hisense's combined advanced LED backlight control and colour management technologies, together with a set of powerful algorithms. Motion is amazingly smooth thanks to Motion Rate 480 and a 120Hz native panel. Dolby Vision™, HDR10+, Dolby Atmos™ and IMAX Enhanced combine to deliver visual and audio realism that brings the cinematic experience right to your home. That's not all, the U88G Series TV is future proof, with HDMI 2.1 and a 120hz refresh rate, ensuring it's next-gen gaming ready.

Did you know:

The U88G is equipped with Game Mode, VRR, ALLM and eARC compatibility. Experience pure realism and stay ahead of the game with minimal input lag - which boosts your chances of scoring legendary wins with seamless connections to all your devices!

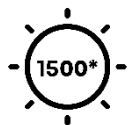

**Hisense
QLED**

Hisense QLED technology unlocks over a billion colour combinations perfectly expressed. It's easier to feel connected to what's real while still enjoying incredible entertainment with the U88G Series Android Smart TV.

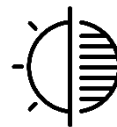

HDMI 2.1

Higher resolutions, higher frame rates and more bandwidth are just a few of the things that allow gamers to take advantage of new graphics features on new generation gaming consoles. Game at 4K up to 120 fps. HDMI 2.1 offers support for eARC, giving you a more simplified connection between your TV and sound system.

1500 nits
peak
brightness

A higher number of nits for a given image means that TVs with HDR technology can reach a higher contrast ratio. With higher nits comes better contrast, which allows the U88G to better differentiate between bright and dark scenes without losing much needed detail. Remember that scene in Game of Thrones - We've got it covered.

Full Array
Local
Dimming Pro

Local dimming controls the backlights located behind your TV screen, ensuring you can catch all the action through increased contrast in dark scenes. The 65U88G has 360 local dimming zones on its full-array backlit LED panel. This provides richer blacks, astonishing highlights, overall improved brightness, increased contrast ratios and panel uniformity to further enhance your movie-watching experience.
