A7 VIDAA Series 4K UHD

Model 55A7GV

Model: 55A7GV

4K Smart TV

WORKS WITH GOOGLE ASSISTANT

With four times more pixels (8.3 million) than standard high-definition TVs, the Hisense A7GV Series 4K Ultra HD Smart TV is built to deliver bright colours and rich contrast in a slim-bezel frame. Dolby Vision HDR* technology maximizes brightness, the UHD upscaler brings lower resolution content as close to 4K as possible, and Motion Rate 120 keeps up with the fastest sports, movies and 4K gaming. This series also comes with popular apps via the Hisense Smart Platform (VIDAA OS), including YouTube, Netflix, Prime Video, Disney+. This makes it easier than ever to personalize your entertainment experience.

VIDAA OS : The VIDAA Smart Operating System is designed with simplicity in mind. Use voice-control and an optimized, customizable menu to navigate the operating system of your TV with ease.

Wide Color Gamut : This feature brings rich vibrant colours to life. Redder" reds, "greener" greens, "bluer" blues, an increased colour bit-depth, and a wider colour space gives you a better, more natural viewing experience - no matter what you're watching.

Dolby Vision® & HDR10 : Cinema-inspired technology that adds ultra vivid imaging, brightness, contrast, colour and detail that brings entertainment to life right before your eyes. The Hisense A7GV Series TV transforms your viewing experience by combining these two technologies with impressive 4K picture quality.

Dolby Atmos® audio : A leap forward from surround sound, Dolby Atmos® transports you from an ordinary moment to extraordinary experience with moving, immersive audio -sound that fills your room and flows around you with breathtaking realism to create a powerful cinema-sounding experience.

HDMI : Grab your High-Speed HDMI cable and experience some of the advanced gaming features on your Hisense TV. Higher resolutions, frame rates, Auto Low Latency Mode (ALLM), and more bandwidth are just a few of the things that allow gamers to take advantage of the new capabilities of the next generation of gaming consoles. Game at up to 60 frames-per-second at 4K resolution. The advanced gaming technologies offer support for VRR; which lets you match your TVs display to the refresh rate of your console.

ALLM : Allows the ideal latency setting to automatically adjust, allowing for smooth, lag-less, and uninterrupted interaction with your TV. ALLM allows your connected gaming console, or computer to send a signal to the TV which makes it switch to a low-latency, low-lag mode for gaming.

Voice Remote : With the voice remote, you can open apps, adjust the volume, and search for your favorite shows using your voice. Just press the microphone button on your remote to talk to Alexa.

TECHNICAL SPECIFICATIONS

DISPLAY
