5.0 CU.FT.

FRONT-CONTROL FREESTANDING RANGE - ELECTRIC

Model: HER30FSC

Fast, Even and Flexible - The Schott Ceran® cooktop utilizes 2 adjustable, 2 fixed and 1 warming radiant burner that offer precise heat and perfect control, making it easy to cook your favorite dish.

True European Convection - The Hisense true convection system uses a third element around the fan to more evenly distribute heat throughout the oven cavity. Evenly bake multiple trays of cookies on both bake racks. When roasting, the Hisense true convection system will help to keep your roasts moist.

Bake, Broil & Roast - When roasting, use the meat temperature probe to ensure you get your roast done the way you want. Choose your meat, set the appropriate temperature and let the oven do its thing! The 8 pass broil element means better results when broiling.

Edge-to-Edge Glass - Hisense European design provides a large window so you can easily monitor how your baking or roasting is coming along. The glass extends across the full width and height of door. With no porcelain bezel to trap cooking grease, you will find cleaning this range a snap.

This all-new range from Hisense is beautifully designed and will look good in any style of kitchen. The large 5.0 cubic foot capacity oven means you have room to cook for your family, friends and anyone else you may be entertaining. It boasts 5 cooktop burners, which allow you to utilize different sized pots and pans for ultimate efficiency. The easy-to-use glass touch display makes setting the oven simple. We can't make your kids eat their vegetables, but we can help make sure they are cooked to perfection.

FRONT-CONTROL FREESTANDING RANGE - ELECTRIC

TECHNICAL SPECIFICATIONS

Performance

Hisense model	HER30FSC
