H6 Series 4K ULTRA HD SMART TV

Model # 55H6607

I'm a big deal

Have you ever seen a 4K UHD TV like this? We're guessing that if you did, it was not this affordable. It has four times more pixels (8.3 million) than standard high-definition TV, so the H6 Series 4K UHD TV has really bright colours, clean lines, and rich contrast. The standard HDR-compatible technology maximizes brightness while the built-in UHD Upscaler converts lower resolution content as close to 4K as possible. This series also features award-winning sound integrated from dbx-tv® and comes with tons of built-in apps to personalize your entertainment.

4K resolution and HDR-Compatible

Loads and loads of pixels—we're talking 8 million—of 4K UHD (3840 x 2160p) resolution. Add that to an HDR-Compatible standard and you get a more vibrant picture full of images that have greater depth and feel so real that you want to reach out and touch them. Thanks to all of this tech, you get a brighter, clearer, more vibrant picture.

4K Upscaler

Don't get rid of your DVD collection. Experience your favourite 1080p resolution movie in a new way. The upscaler will convert your movie in or near 4K to give you a crystal-clear picture.

Award-winning audio technology

Let the rich sound integrated by dbx-tv® Award-Winning Audio Technology, carry you away. You'll hear every detail in the background of your favourite movie and experience it differently.

One-touch Hot Keys

This smart TV will always remember where you left off in a show, is always connected to the Internet and has one-touch hot keys that launch select on-demand services.
